

## JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV expedition. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

While on their journey, John spent time talking to previous business associates whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered an infinite marketplace for a product that could swiftly and safely elevate individuals in the air to accomplish maintenance and other construction services.

Following their return from holiday, John set up a joint venture with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into current models.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the business proudly continues to expand itself into different markets globally and develops new products to make certain customers are capable of being more efficient and perform in the workplace within a safer environment.
