

Forklift Electrical Part

Forklift Electrical Parts - Forklifts can be purposely marked to be used in unsafe places. A marked truck denotes the design has met the least requirements of ANSI/UL 558 utilized for engine powered lift trucks or ANSI/UL 583 utilized for electric lift trucks for the type of label attached.

Applications for marked trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Consult your local insurance carrier and Fire Marshall for further info regarding the permitted uses of industrial powered trucks in your application.

If the particular lift truck meets the outlined criteria, labels could be attached. A labeled lift truck would show the type of designation located on the nameplate and will have a properly corresponding label placed.
